Engaging the future

The role of real estate in the economic equation is changing.

The real estate industry has a whole new cycle to work with over the next 30 years, fostering a lasting, positive impact in each and every built environment.

As MIPIM 2019 celebrates its 30th edition, the main theme for our Conference Programme is Engaging the Future - a unique opportunity to envision the next 30 years under the lens of 'durability': an enabler for economic growth, sustainable performance and community cohesion.

How to choose the best strategies that benefit over the longer term?
How to choose the best strategies to ensure people's quality of life?
How to commit responsible practices and employ existing resources optimally?

For this special edition, MIPIM more than ever focuses on global and societal topics impacting the real estate industry.

Join us at MIPIM 2019 to "engage" the future!
